

PROJECT PORTFOLIO DOCUMENT

Mustafa Madraswala

Developer Founder Portfolio

A cinematic, Syphre-inspired personal portfolio built to position Mustafa as a developer, founder-minded product builder, and engineer with both interface taste and production discipline.

BUILDER

MUSTAFA MADRASWALA

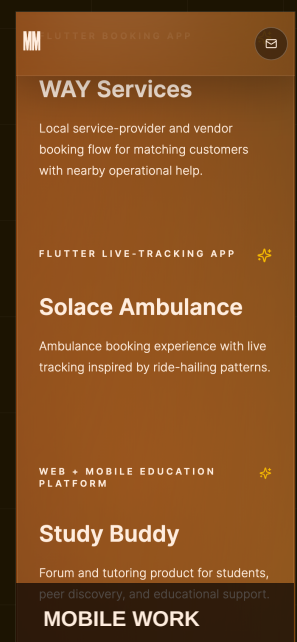

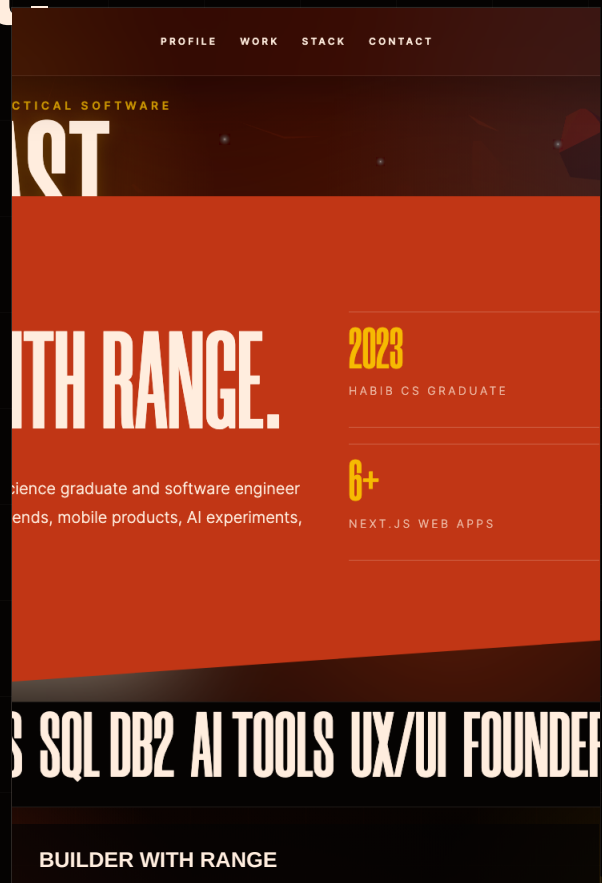

LIVE HERO EXPERIENCE

A portfolio that feels like a product

The site is designed as a scroll-led founder profile rather than a static resume. It combines a cinematic 3D stage, bold editorial typography, a dark ember visual system, and structured proof points across mobile, web, enterprise, AI, and design work.

Primary goals

- Establish premium first impression
- Show range without feeling scattered
- Make resume content easier to scan
- Give recruiters, collaborators, and clients direct routes to contact, GitHub, LinkedIn, and resume

SELECTED BUILDS

Apps that move.

The work section highlights project variety while preserving a consistent portfolio voice: product purpose, platform context, and practical user value.

APPS THAT MOVE.

A portfolio shaped by mobile apps, Next.js platforms, internal systems, and practical experiments at the edge of design and engineering.

FLUTTER MOBILE PRODUCT

FLUTTER BOOKING APP

FLUTTER LIVE-TRACKING APP

Vembrace Health

SRHR health social media application designed around community, access, and mobile-first engagement.

WAY Services

Local service-provider and vendor booking flow for matching customers with nearby operational help.

Solace Ambulance

Ambulance booking experience with live tracking inspired by ride-hailing patterns.

WEB + MOBILE EDUCATION PLATFORM

NEXT.JS + AI INTEGRATION

NEXT.JS PLATFORM

Study Buddy

Forum and tutoring product for students, peer discovery, and educational support.

AI Image Generator

Creative generation tool using Midjourney and OpenAI-style workflows for image production.

Simple Mining

A larger web application built with modern front-end patterns and product-facing flows.

DARK ORANGE WORK SYSTEM

Vembrace Health

FLUTTER MOBILE PRODUCT

SRHR health social media application designed around community, access, and mobile-first engagement.

WAY Services

FLUTTER BOOKING APP

Local service-provider and vendor booking flow for matching customers with nearby operational help.

Solace Ambulance

FLUTTER LIVE-TRACKING APP

Ambulance booking experience with live tracking inspired by ride-hailing patterns.

Study Buddy

WEB + MOBILE EDUCATION PLATFORM

Forum and tutoring product for students, peer discovery, and educational support.

AI Image Generator

NEXT.JS + AI INTEGRATION

Creative generation tool using Midjourney and OpenAI-style workflows for image production.

Simple Mining

NEXT.JS PLATFORM

A larger web application built with modern front-end patterns and product-facing flows.

TECHNICAL SYSTEM

Design taste, engineering teeth.

STACK MAP

TOOLS IN ORBIT.

A practical stack for shipping across web, mobile, back-end systems, AI experiments, and visual product polish.

FRONT END	MOBILE	BACK END	DATABASE	DESIGN
Next.js	Flutter	Java	SQL	Figma
React	Dart	Quarkus	DB2	Canva
Vue	Android	.NET Core	MongoDB	Photoshop
HTML	iOS	ASP.NET	Python	Illustrator
CSS	Live tracking	MVC	R	UX/UI
Tailwind	Booking flows	Node.js	Jira	
TypeScript		Express	Taiga	Brand polish

TOOLS IN ORBIT

The implementation uses Next.js App Router, React, TypeScript, Tailwind, Framer Motion, Three.js, React Three Fiber, and Drei. The visual identity borrows from the Syphre-style language: oversized Morganite display type, dark atmospheric panels, red/orange glow fields, clipped sections, and a scroll-reactive WebGL stage.

Front End

Next.js React Vue HTML CSS Tailwind TypeScript

Mobile

Flutter Dart Android iOS Live tracking Booking flows

Back End

Java Quarkus .NET Core ASP.NET MVC Node.js Express

Data

SQL DB2 MongoDB Python R Jira Taiga

Design

Figma Canva Photoshop Illustrator UX/UI Brand polish

PROFESSIONAL CONTEXT

Real-world reps.

The experience section reframes resume history as proof of delivery context: enterprise reliability, fast-moving internships, cloud maintenance exposure, and freelance product delivery.

EXPERIENCE

REAL-WORLD REPS.

BAH

OCT 2023 - PRESENT

Bank AL Habib Limited

Senior Software Engineer / Developer

Working across banking software, React, TypeScript, Tailwind, Java/Quarkus, Maven, SQL, DB2, and internal systems.

HT

SEP 2023 - OCT 2023

Horizon Technologies

Front End Developer Intern

Built front-end interfaces with JavaScript, Vue.js, HTML, Tailwind, and .NET Core exposure.

SL

JUN 2023 - SEP 2023

Systems Limited

Cloud App Dev & Maintenance Intern

Worked on cloud application development and maintenance after graduating from Habib University.

EXPERIENCE SECTION

JUN 2022 - PRESENT

Delivered web interfaces, UI systems, and product

Bank AL Habib Limited

OCT 2023 - PRESENT • SENIOR SOFTWARE ENGINEER / DEVELOPER

React, TypeScript, Tailwind, Java/Quarkus, Maven, SQL, DB2, and internal banking systems.

Horizon Technologies

SEP 2023 - OCT 2023 • FRONT END DEVELOPER INTERN

JavaScript, Vue.js, HTML, Tailwind, and .NET Core exposure.

Systems Limited

JUN 2023 - SEP 2023 • CLOUD APP DEV & MAINTENANCE INTERN

Cloud application development and maintenance after graduating from Habib University.

Upwork / Fiverr

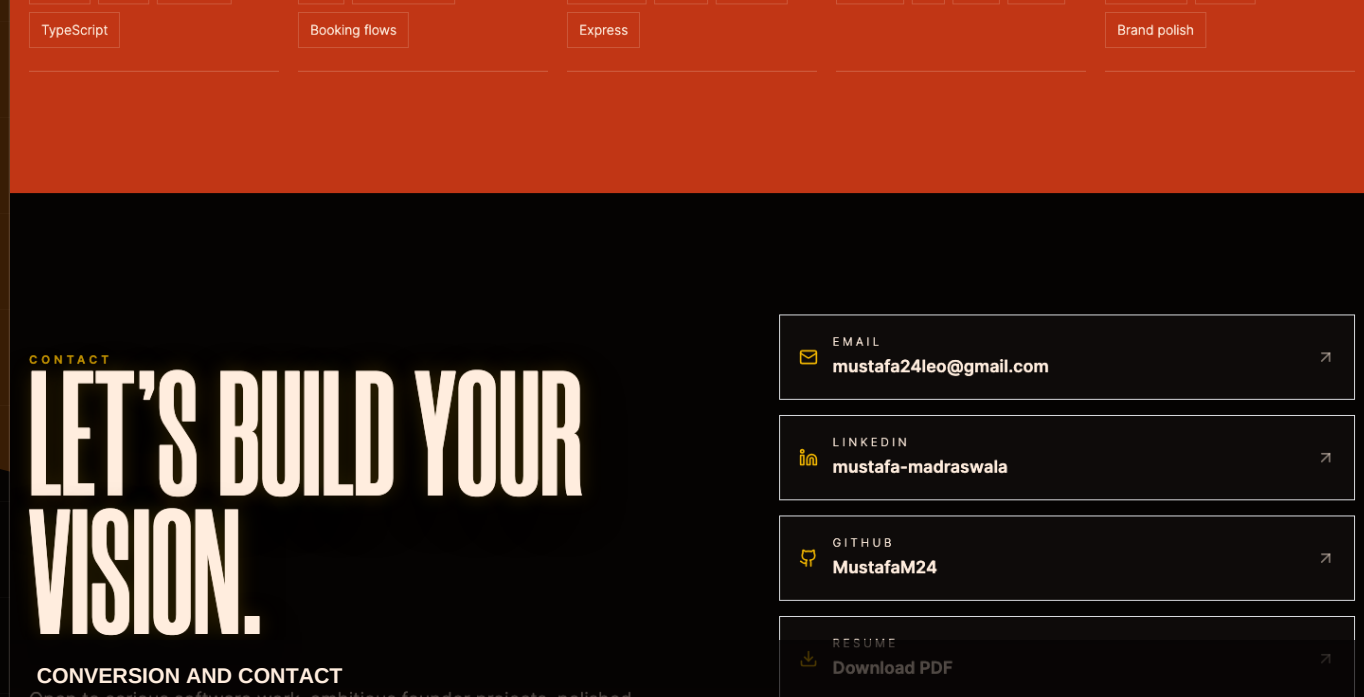

JUN 2022 - PRESENT • FREELANCE FRONT END + UX/UI

Web interfaces, UI systems, and product-facing builds with visual polish.

DELIVERY NOTES

Built for launch-day polish.

The project delivers a full personal profile website with a distinctive visual signature, responsive sections,

Key outcomes

- Cinematic first impression with scroll-responsive WebGL stage
- Structured profile narrative: range, projects, experience, stack, contact
- Mobile and desktop responsive layouts
- Reusable visual system aligned with Syphre-inspired dark ember theme
- Production build verified with Next.js
